

# Sandvik cone crusher filter kit

Filter kit for the CH880 cone crusher

## A PACKAGE DESIGNED FOR EFFICIENCY

Effective and high-quality filters bring assurance of a reliable crusher performance. To gain maximum functionality of your Sandvik cone crusher, we have selected and tested every filter in this kit individually. Thereby you will get optimized performance in each filter function. In addition the crusher will be operating with clean oil until it is time for the next filter change.

The Sandvik filters have been developed according to the same high quality standards as the Sandvik cone crushers. We are able to offer filter kits for all Sandvik cone crusher models.

- Extend the crusher life
- Maximize the crusher performance
- Minimize maintenance time
- Reduce operating costs

The Sandvik filters are correctly dimensioned for relevant oil-flow volumes and are designed to operate within the recommended service intervals.

### ON-TIME MAINTENANCE GIVES EXTENDED CRUSHER LIFE

Crushers often operate in dusty environments which might have a detrimental impact on the cleanliness of the oil. By changing air filters regularly the over-pressure system stands a better chance of keeping the dust from the inside of the machine. By having an extra filter kit always close at hand, you can save valuable production time - time that you would rather not spend on repairs.

### ORIGINAL SPARE PARTS GIVE BEST RESULTS

When it is time for filter change, do not compromise on quality. For a long-lasting, high-performance cone crusher that doesn't require time spent on unnecessary repairs, we recommend that you use original parts only. To achieve best results, let your Sandvik crusher remain a Sandvik crusher!

### PART NUMBERS

Crusher model	Part number	Contents
CH/CS420-430	452.5542-901	1 x filter HC 69 1 x filter cartridge HC2 1 x filter cartridge 852516 MIC 1 x filter cartridge 852.514 MIC
CH/CS440-660	452.5543-901	4 x filter HC 69 2 x filter cartridge HC2 1 x filter cartridge 852516 MIC 1 x filter cartridge 852.514 MIC
